

Empathy Map – Food Delivery App User

Understanding User Needs, Feelings, and Behaviours

Made with GAMMA

What is an Empathy Map?

Deep Understanding

A visual tool that helps designers understand users on a deeper level

Four Dimensions

Maps out what users **say, think, do, and feel**

Reveals Insights

Uncovers motivations, frustrations, and unmet needs

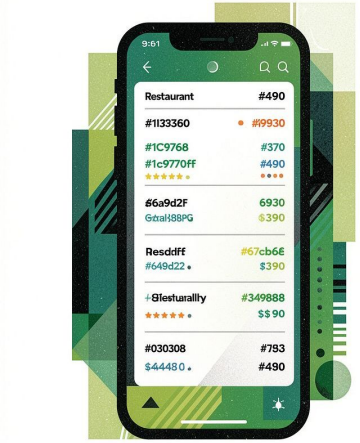

Bridges the Gap

Connects assumptions to real user insights for user-centered design

Meet Arun – Our User Persona

Who He Is

Arun, 20 · College Student

Smartphone-first · Highly tech-savvy

His Habit

Orders food delivery **3–4 times per week**

Uses multiple apps to compare deals

His Goal

Quick, tasty food that fits a **student budget**

Values speed, affordability, and simplicity

Made with GAMMA

Empathy Map Framework

🗣️ Says

What the user explicitly communicates

💭 Thinks

What occupies the mind (may differ from what they say)

🤝 Does

Observable actions and behaviours

❤️ Feels

Emotions and emotional responses

Made with GAMMA

What Arun Says

"I want my food within **30 minutes**—no excuses."

"Show me **ratings and reviews** before I order."

"**No hidden fees**—show me the delivery charge upfront."

"I love apps with **good discounts and loyalty rewards**."

Made with GAMMA

What Arun Thinks

Trust & Hygiene

Is this restaurant trustworthy and hygienic?

Timeliness

Will my food arrive on time and still be hot?

Savings

Are there any active discounts or coupons I can use?

Security

Is my payment information secure on this app?

Tracking

Can I track my order in real-time?

Accuracy

What if the order is wrong or the food is bad?

Made with GAMMA

What Arun Does

Search Nearby Restaurants

Compare Menus & Ratings

Rate & Share Feedback

Order & Track Delivery

1 Search & Compare

Browses nearby restaurants, compares prices and delivery times across apps

2 Order & Save

Applies coupons and promo codes before completing checkout

3 Track & Monitor

Checks real-time status and estimated arrival time frequently

4 Rate & Share

Leaves reviews and shares restaurant recommendations on social media

Made with GAMMA

What Arun Feels

😤 Impatient

Hungry and wants food fast

🤩 Excited

Discovering new restaurants and offers

😰 Anxious

Worried about delays or wrong orders

😊 Delighted

When food arrives hot and on time

😤 Frustrated

Late delivery or confusing app UI

😞 Disappointed

Food quality doesn't match photos or reviews

Pain Points & User Needs

⚠️ Pain Points

- Late or unpredictable deliveries
- Unexpected high delivery charges
- Incorrect or incomplete orders
- Poor food quality upon arrival
- Confusing or cluttered app interface
- Limited payment options
- Lack of real-time tracking transparency

✅ User Needs

- Intuitive and fast navigation
- Accurate, real-time delivery tracking
- Transparent and competitive pricing
- Reliable restaurant partners with quality assurance
- Simple, secure checkout process
- Helpful reviews, ratings, and photos
- Responsive customer support

UI/UX Design Insights & Recommendations

Simple Navigation

Minimize steps to order — search, select, checkout in 3 taps

Smart Discovery

Filter by cuisine, ratings, delivery time, and price range

Transparent Pricing

Show all costs upfront — food, delivery fees, and taxes

Real-Time Tracking

Live map with delivery partner location and accurate ETA

Social Proof

Prominent ratings, reviews, and user-uploaded food photos

Feedback Loop

Easy post-delivery rating system to build trust and quality

> *"Understand the user first, then design the experience."*
